

## Hoàng Sơn Tùng

Date of Birth: 08/08/1999

Phone: (+84) 967134899

Email: [megatunger@gmail.com](mailto:megatunger@gmail.com)

Address: Viet Hung, Long Bien, Hanoi, Vietnam

Github: <https://github.com/megatunger>

## Objective

I am a fourth year student who has experienced in working freelance projects and multiple domain (Web/Mobile). I am currently looking for new challenge I hope my experiences can meet company requirements and contributing values.

## Experience

### **COMPANY: TEKO VIETNAM - FRONT END DEVELOPER – 7/2020 - PRESENT**

- Project: Design System (7/2020 - 9/2020). Main responsible for coding, working directly with designers & product owners to deliver from designs to a JS package, using React.js + Typescript. I collaborated with a team of 5-8 people (2 Designers, 2 Programmers, 1 Manager, 1 Product Owner)
- Project: E-commerce platform for multiple tenants (9/2020 - Now). Now I working in others company's project, to maintain & developing new features or design them. The team size is 15+ people. Also using React.js + Typescript

### **PROJECT: BINH MINH ERP - FREELANCE DEVELOPER – 2019 - PRESENT**

- Developing an ERP system for an education centre to help them tracking revenue, manage students, check-in, notifications, test banks. This system including design back-end system for their mobile apps. This system was built with Ruby on Rails and deployed on AWS. I am the only one responsible for this project, from the initiation stage to deploy stage & maintain it
- This project also come up with 3 apps: BM Student, BM Admin, BM Parents. All apps are available on both App Store & Play Store. At first, I'm used Swift for native iOS App BM Student, and the rest was Flutter as cross-platform framework to speed up development process. But now, all apps had been migrated to Flutter to speed up process. Total users currently about 1000 students with daily 150+ students using. The admin dashboard could be found at: <https://binhminh.megatunger.com>

### **PROJECT: AISTEAM - FREELANCER DEVELOPER – 12/2019 - 7/2020**

- At first, Project was designed a 3 simple landing pages, I'm using HTML & CSS for this. Source code is available at here: <https://github.com/megatunger/LandingPageForAIA>

- After that, client want to extend their website and I am developed a website for them. This project including many customized pages, a content management, e-commerce functions. The website is currently online at: <https://aisteam.com.vn>

#### **PROJECT: SOLVEX - DEVELOPER - 2020 - PRESENT**

- I work a member of founding team and trying to solve problems in education. I developed an app called "SolveX" using Flutter. The back-end system I used Ruby on Rails

#### **PROJECT: TESTREADY - GROUP PROJECT OF WEB APPLICATION COURSE**

- This project was our group (3 members) final project. We have to design a system to register exam. The source code & demo can be found here: <https://github.com/megatunger/testready>. My role is team leader & RoR trainee for other members. This project was one of highest-rated project in class.

## **Education**

- University of Engineering and Technology - Major: Computer Science
- Class of 2017-2021, GPA: 3.12/4.0

## **Skills**

- Web: HTML, CSS, JS, jQuery, Pjax, React.js, Typescript, Python (Flask), PostgreSQL, Ruby on Rails, familiar with Ruby Rails libraries such as: Devise, Clearance, Sidekiq, Jbuilder, ActiveRecord (Postgres), ActiveJob, Capistrano,...
- Mobile: Flutter, Swift, RxDart, RxSwift
- DevOps: Amazon Web Services (EC2, S3 storage), Firebase, Passenger & Nginx, CI/CD with Gitlab, Sentry

## **Achievements**

- Winner of JunctionxHanoi 2018 - <https://devpost.com/software/phoenixui>.
- Blockchain Track Winner at Junction 2018 (Finland) - <https://bit.ly/2zyy9Tv>. My role is UI Designer & React Native Developer
