Experience

CÔNG TY: SMARTOSC - REACT NATIVE / F.E DEVELOPER (1/2021 - NOW)

- Main responsible for building a tablet app with React Native for Japanese customer. I working with 1 developer for supporting me.
- Parallel to that project, I also working in front-end team (6+ developers) to building and maintaining different web projects for client
- Tech Stack: React Native, React.js

CÔNG TY: TEKOVietnam - INTERNSHIP – 6/2020 - 1/2021

- Join in talented internship program, my role was front-end developer.
- First project I was responsible for is a design a Design System library for back-office developer. I worked directly with product owner and designers to delivery from designs to Javascript package and documentation.
- After that, I was switched to core front-end team of company and responsible for maintaining some of company e-commerce sites (VNShop, PhongVu,...) with 10-people team.
- Tech Stack: React.js, Next.js, Typescript

STARTUP: UCALL - TECHNICAL LEAD – 11/2020 - NOW

- I was one of 4 founders of this startup, and our project focusing in Call Center market. We using AI voice technologies to create automated call or automated response to user.
- My responsible was researching features & UI, and managing most technical issues for project.
- This project won I-Startup competition & in progress raising funded from Vietnam Silicon Valley

PROJECT: ZENAPP - FREELANCE DEVELOPER – 12/2020 - HIỆN TẠI

- Joined with team from scratch for building e-commerce system, my role was Full-stack & Mobile Developer
- Team had 5 developers and working fully remote. We built features and optimize as client request continuously

- Tech Stack: Next.js, Ruby on Rails, React Native

PROJECT: BINH MINH ERP - FREELANCE DEVELOPER – 6/2019 - 12/2020

- Building a full ERP system for an education center with features like: Student Management, Scheduling, Test Banks, E-learning, Accounting. I was the only one responsible for this project, from getting requirements, design UI and deliver feature as a web application. System was built on Ruby on Rails and using infrastructure of Amazon Web Services.
- I also deliver 3 apps (both Android & iOS) for 3 role: Student, Parent, Admin to boost their digital transformation. These app served 3000+ students, 300+ students everyday

MY OTHER PROJECTS:

- AISTEAM: <https://aisteam.com.vn>
- SolveX: Available on App Store & Google Play

Education

- University of Engineering & Technology - Computer Science.
- GPA: 3.21/4.0 - Classification: Very good

Skills

- Frontend: HTML, CSS, JS, jQuery, Pjax, NextJS, React.js, Typescript
- Backend: Python (Django, Flask), PostgreSQL, Ruby on Rails, PHP, NodeJS
- Mobile: Flutter, Swift, React Native
- DevOps: Amazon Web Services (EC2, S3 storage), Firebase, Passenger & Nginx, CI/CD with Gitlab, Sentry
- UI Design (worked as Remote Designer before)

Thành tích

- Championship of JunctionxHanoi 2018 - <https://devpost.com/software/phoenixui>.
- Winner in Blockchain Track at Junction 2018 (Finland) - <https://bit.ly/2zyy9Tv>.
